

Technology out in the open

City machines

With more than 5.000 parking toll machines manufactured from 2004 to 2007, TECNICHAPA is now a reference within the city equipment manufacturing market. As a trustworthy industrial partner, TECNICHAPA supplies global solutions to its clients.

PARKEON has outperformed as a key reference for the latest developments regarding city equipment. Pioneering in the market since the sixties, they are leading the European market supplying all parking devices and city equipment.

Materials

- Cold rolled sheet metal (DC01), hot rolled (DD11)
- Galvanised sheet metal (DX51D),
- Electro-galvanized sheet metal (ZE25/25),
- Stainless steel (AISI 304, 304L, 316, 430,...)
- Plastic materials, components, cabling

Qualifications

TECNICHAPA is certified upon clients' requirements, in addition, its Quality Management System is certified upon ISO 9001:2000 standard.

Products

- Standard parking toll machines
- E-cash payment parking toll machines
- Adapted parking toll machine for disabled people
- Aggressive climate parking toll machines

Process

- Laser cutting
- Punching
- Milling
- Screwing
- Press-bending
- Manual TIG welding
- MIG manual and robotised welding
- Laser Welding
- Liquid and powder automatised painting line
- Cataphoresis and Cinc-coating
- Electromechanical assemblies
